

AMENDMENTS TO THE CLAIMS

Kindly replace the claims as follows.

1. (currently amended) A pre-filled plastic-syringe barrel using cyclic polyolefin resin as a material, for holding fluid, comprising:

~~a nozzle portion at the forward end of the plastic-syringe barrel for permitting attachment of an extension tube or other device in which an outer cylinder and an inner cylinder are formed, and~~

a luer lock portion formed in a nozzle portion and comprising a cylindrical space formed by an inner peripheral surface of the outer cylinder and an outer peripheral surface of the inner cylinder,

wherein all or part of an inner peripheral surface of said outer cylinder, and/or all or part of an outer peripheral surface of said inner cylinder ~~surface of said luer lock portion~~ have/has a roughened surface.

3. (currently amended) The pre-filled plastic-syringe barrel according to claim 1, wherein said inner peripheral surface of said outer cylinder contains a helically continuous screw thread, and the surface of said screw thread or screw root portion formed between adjacent ridges of the screw thread has a roughened surface.

5. (currently amended) The pre-filled plastic-syringe barrel according to any one of claims 1, 2, and 3 and 4, wherein said roughened surface is a surface formed by blast treated treatment.

Please cancel claims 2 and 4 without prejudice and without disclaiming any of the subject matter contained therein.
